Subject: Private Property Access Routes

Damon:

Would you please post the attached letter on the ORV web site asap so the Committee can review for tomorrow's meeting.

Thanks

Lyle Pedro Private Property Access.html

August 15 2010

Ref: Private Property Access Routes

Superintendent Ramos and Others:

Private Property Access Routes should connect to the nearest Designated Primary ORV trail by the most direct sustainable route. Factors for considering the Sustainability of Private Property Access Routes should be the same as those factors used in considering the sustainability of Primary and Secondary trails.

Private Property Access Routes that serve to access private property only and not accessible to the general public should not be considered as part of the formal ORV trail system and should be shown on all maps as Private Property Access Routes. This will let people know when planning their route where they are not allowed. The total mileage of these Private Property Access Routes should not be considered as part of the total mileage of Primary or Secondary ORV trails.
